

The WHOOPS! Gallery: An Intersection of AI, Creativity, and the Unusual

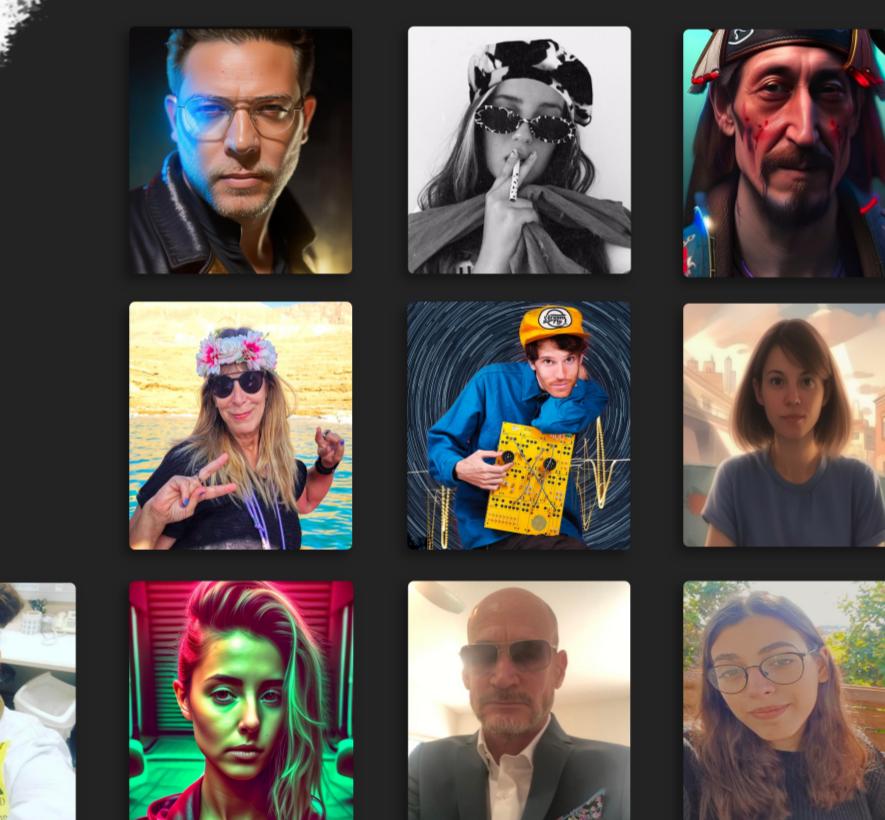

Nitzan Guetta Bitton, Yonatan Bitton, Jack Hessel, Ludwig Schmidt, Yuval Elovici, Gabriel Stanovsky, Roy Schwartz

What Makes These Images Weird?

World Wild AI Researchers Collaboration

A Team of >30 Expert Designers Employing Text-to-Image AI Models

What is WHOOPS!?

- Commonsense-violating synthetic images
- Human artists were hired via social media
- Use of text-to-Image generation models

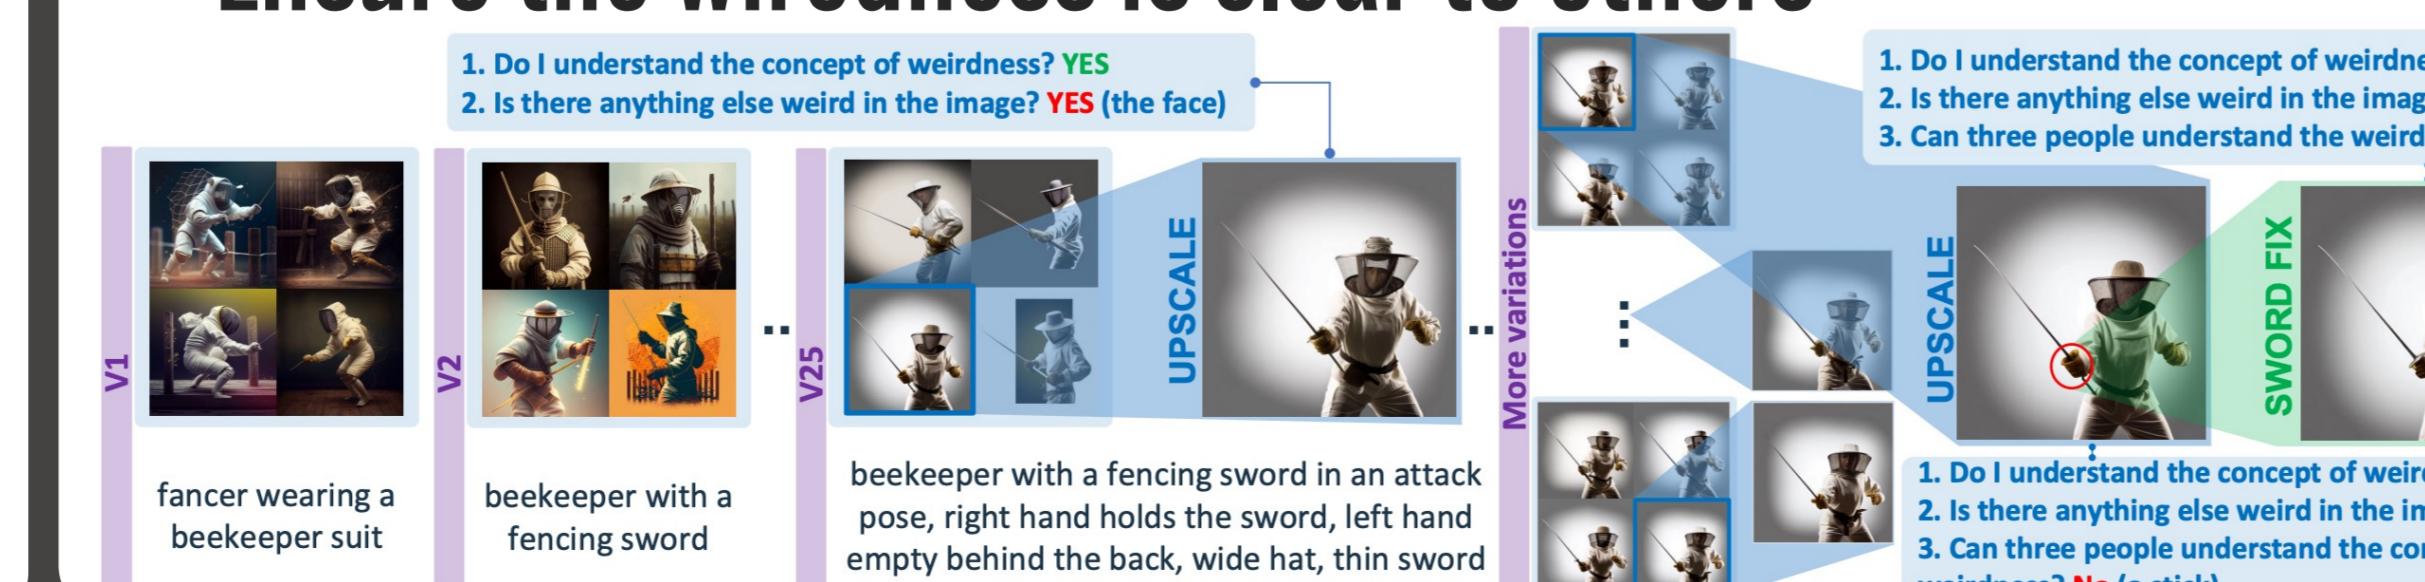

These exist "in-the-wild" as well ..

How to Create a Weird Image?

- Depict two likely to co-occur items X (=Slash) and Y (=Guitar)
- Switch Y to Y' (=Saxophone) that is unlikely to co-exist with X
- Ensure the wiredness is clear to others

Our Designers

- A diverse team of over 30 designers, spanning ages, genders, and origins, found joy in coming up with new ideas to create such images.

Omer Luz (Peter Spacey)

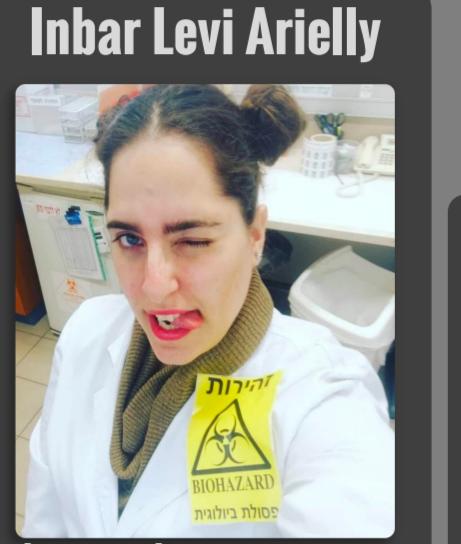

Evgeny Ermilov

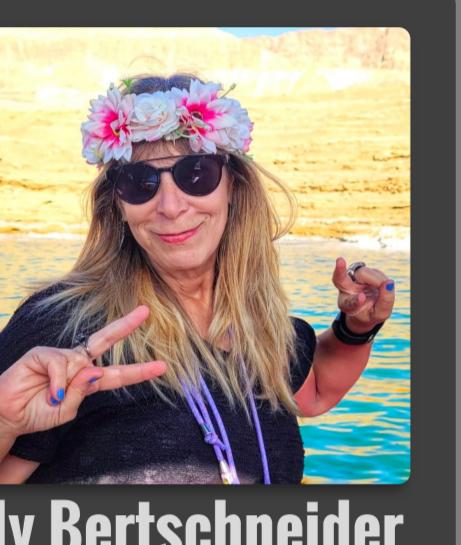

Karin Milman

Unlike others that were involved in the project my interest in an AI was (and mostly is) a fun hobby or pass time. As a new mom I found that letting my creativity loose using AI was a relatively fun and easy way of getting my mind working without any physical mess. When I found out about the project, I thought it can be a challenging activity to do in my spare time. As a master in biology, it was natural for me to base a lot of my works on my scientific knowledge but try and keep them as simple and easy to understand as possible. The work with the different AI models was very challenging, as well as coming with different ideas and ways to explain those ideas through words, but I loved every moment.

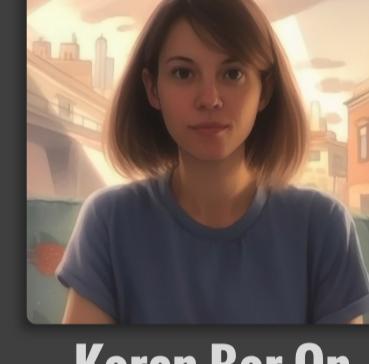

Inbar Levi Arielly

Nir Livni

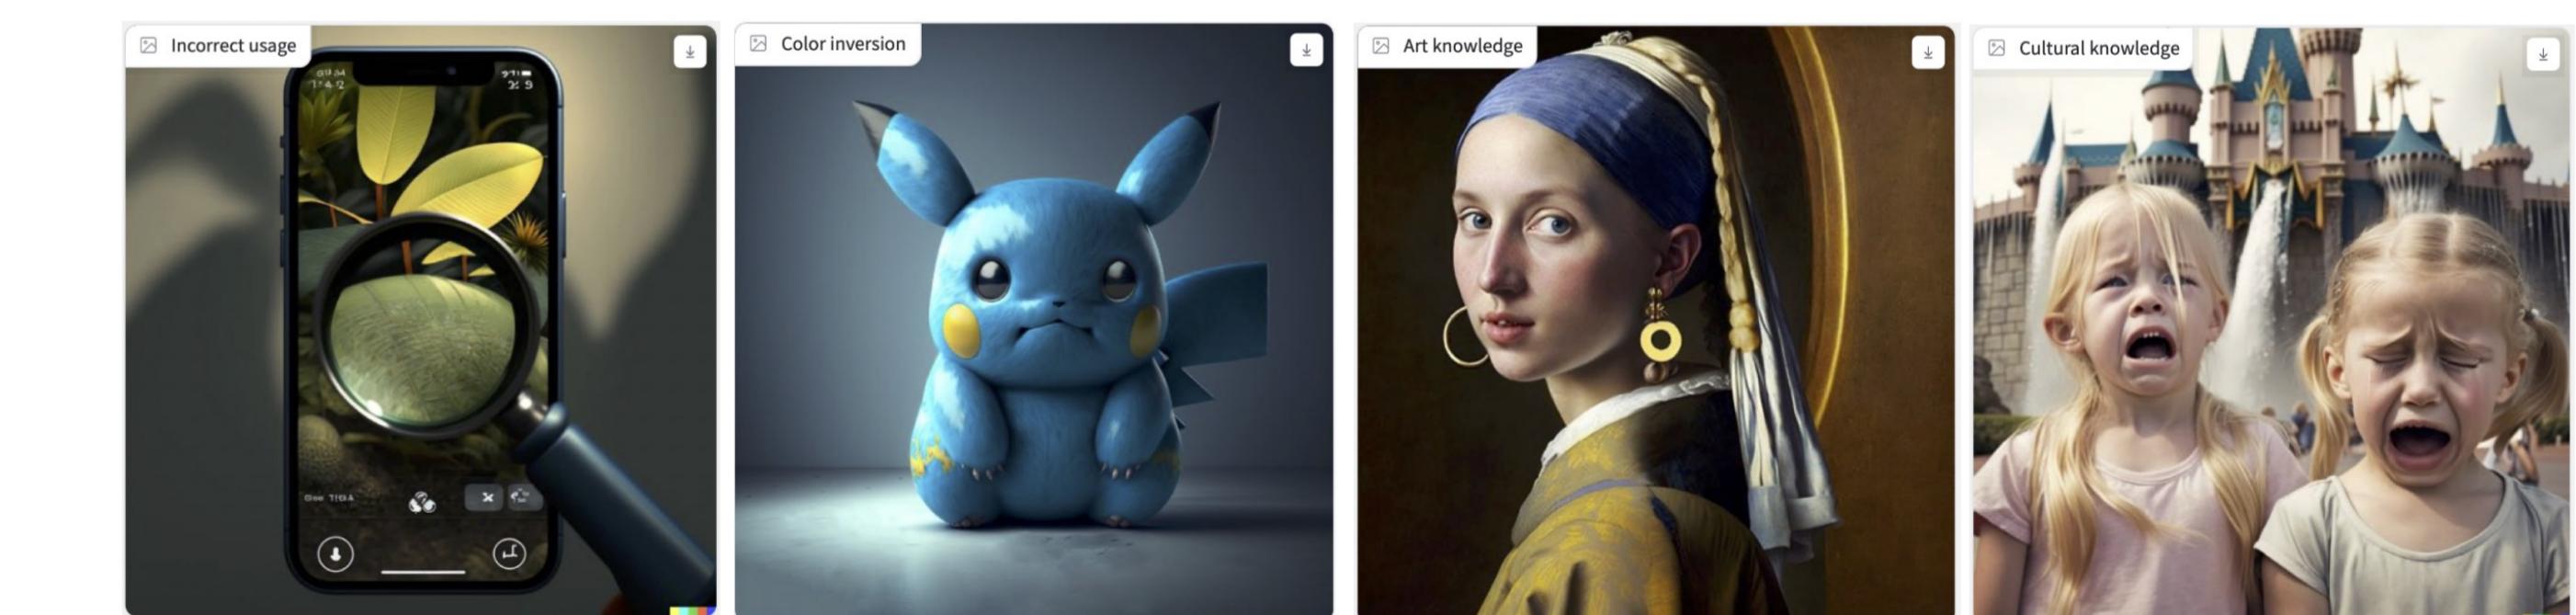

Ady Bertschneider

Karen Bar On

As a digital creator, I find it incredibly fun to create weird and ironic images with AI. With my crazy and artistic mind, coming up with these ideas is nature to me. Using AI as a tool allows me to take my creativity to the next level. Whether it's combining unexpected elements or subverting traditional imagery, the process of creating these images brings me joy. With each new creation, I push the boundaries of what's possible.

Commonsense Categories
